

*The Early Learning Experts®*

# Professional Development Technology Trainings

Spend a professional development day learning with Hatch!

Hatch's Professional Development Technology trainings deliver in-person training that is designed to fit your organization. Our customizable training sessions are delivered by certified Classroom Integration Consultants (CICs) and help you make the most of your investment in Hatch technology. No matter the level of experience that your educators have with technology in the classroom, our training can help support teachers at any level in just one day.

# We're Ready to TEACH the TEACHERS

From small group trainings, to multi-program organizations, we do it all!

## Full Day

Our CIC will arrive at your center to provide two half-day, hands-on training sessions for educators (maximum 8 hours on-site, in the same building).

## Additional Full Day

Our CIC will remain on-site for an additional day (maximum 8 hours) of hands-on training after the initial onsite professional development day. This additional day will include two half-day training sessions for teachers and administrators.

## Additional Half Day

Our CIC will remain on-site for an additional half day (maximum 4 hours) of hands-on training. NOTE: Half Day sessions can only be purchased with Full Day sessions.

## How does it work?

During a consultation with one of our early learning experts, you'll talk about your organization's needs and areas in which your educators need more support. You'll decide how long your training should be; we offer full and half day training options that fit your schedule. Then, our early learning expert will work with you to determine the training material that will help you reach your organization's goals.

On the day of training, a certified Hatch Classroom Integration Consultant (CIC) will arrive at your center to conduct training sessions. With extensive real-world experience in early learning environments, Hatch CICs are uniquely qualified to guide teachers and administrators in making the most of their Hatch technology solutions. During training, educators can ask questions, get hands-on help and cover topics that are not addressed during the initial installation training.

.....

## Please Note:

- The customer is responsible for providing a training location, Hatch technology, room setup and internet access.
- Additional travel fees may apply to remote areas and/or locations in which our network has no coverage.
- Sessions must be scheduled 60 days in advance.
- Maximum number of session participants is 24.

# Hatch Professional Development Technology Trainings

---

At Hatch, we think of ourselves as a partner in your early childhood program's professional development training experiences; one that's as committed to enhancing the skills and knowledge of your early childhood educators, regardless of experience or learning style, as you are. We offer sessions and resources to meet the needs of the early childhood classroom.

## iStartSmart® Training for Teachers

### iStartSmart 101

In this hands-on session, teachers will learn the basic skills they need to begin implementing iStartSmart in their classrooms. They will discuss strategies for classroom integration, explore the built-in learning scaffold (including automated child progress monitoring), learn how to navigate the Report Management System, and practice setting up their classroom and adding children. This training can be tailored to include the features and impact of HatchSync powered by *GOLD*®.

### Using iStartSmart Data to Make Instructional Decisions

Designed for experienced iStartSmart users, this advanced session helps teachers master the process of reviewing, analyzing, and adjusting skill development content to address the needs of individual children. Teachers will examine and evaluate a child's progress, learn how to address individualized learning opportunities within the product and explore features that support engaging teacher/child interaction.

### Using iStartSmart Progress Monitoring Information to Teach Intentionally

Intentional teachers use their knowledge of best practices, understanding of each child and relationship-building expertise to support individual children's development and learning. iStartSmart helps make that process easier real-time information about each child to individualize instruction in meaningful ways. This immersive half-day course introduces teachers to the power of real-time progress monitoring and how to use that information beyond technology to support children's learning in developmentally appropriate ways.

## iStartSmart® Training for Administrators

### iStartSmart 101

Administrators will examine their roles and responsibilities related to supporting teachers' iStartSmart implementation. After exploring features and best practice implementation strategies, administrators will use new knowledge and shared experiences to develop a robust training and support plan for teachers at different levels of experience, and develop strategies for providing positive, ongoing support. Customers who own iStartSmart and HatchSync powered by *GOLD*® will also get an introductory review of both products.

### Interpreting and Using iStartSmart Data

Participants will be introduced to the purposes, structure and administrator features of the iStartSmart Report Management System; discussions will be focused on supporting teachers through implementation. Administrators will learn about the major reports that are featured in iStartSmart and practice interpreting the data found in the reports. Additionally, participants will identify and discuss a variety of implementation challenges and ways to overcome them.

## WePlaySmart® Training for Teachers

### WePlaySmart 101

In this hands-on session, teachers will learn the basic skills they need to begin implementing WePlaySmart in their classrooms. They will discuss strategies for classroom integration, child progress monitoring, and practice setting up their classroom and adding children. They will listen to authentic conversations in their classroom that WePlaySmart has captured, and discover how their children are developing in the four core social-emotional skills through cognitive play.

## WePlaySmart® Training for Administrator

### WePlaySmart 101

In this session, administrators will examine their roles and responsibilities related to supporting teachers' WePlaySmart implementation. After exploring the features and best practice implementation strategies, administrators will learn to use new knowledge and shared experiences to develop a robust training and support plan for teachers at different levels of experience, and develop strategies for providing positive, ongoing support.

## TeachSmart® Training for Teachers

### TeachSmart 101

In this hands-on session, teachers will learn the basic skills they need to begin implementing TeachSmart in their classrooms. They will explore the various activities within the Hatch teaching guide, and discuss strategies for classroom integration and setting up daily activity plans. Teachers will also create classroom portfolios for their children and an introduction to using teaching guide activities for assessment documentation.

### Using TeachSmart for Documentation

Designed for experienced TeachSmart users, teachers in this advanced session will master the process of saving and collecting children's work, and use this work to meet documentation goals.

## Customizing TeachSmart

Designed for experienced TeachSmart users, this advanced session helps teachers create their own activities using the built-in tools in the navigation guide. Teachers will work through adding individual pictures and incorporating them into their lessons. They will also expand their knowledge of recording sounds, linking sounds and websites to activities, and explore creating and organizing content to use for years to come.

## TeachSmart® Training for Administrators

### TeachSmart 101

In this session, administrators will examine their roles and responsibilities related to supporting teachers' implementation of TeachSmart. After exploring the features and best practice implementation strategies, administrators will use new knowledge and shared experiences to develop a robust training and support plan for teachers at different levels of experience and develop strategies for providing positive, ongoing support.

## CoreFocus® Training for Teachers

### CoreFocus 101

In this hands-on session, teachers will learn the basic skills they need to begin implementing CoreFocus in their classrooms. They will explore the various activities within the Hatch teaching guide, and discuss strategies for classroom integration and setting up daily activity plans. Teachers will also create classroom portfolios for their children and an introduction to using Teaching Guide activities for assessment documentation.
