

Ignite STEAM Lessons in the Summer with Hatch Early Learning

Enjoy this fun activity and foster continuous learning during the summer months. Designed to encourage curiosity and hands-on experimentation, these lessons are offered for families and caregivers to facilitate with children at home.

BUILD IT UP

Goal: To help your child practice measuring by using the words shorter and taller

Overview: As young children learn how to build and stack blocks, they often love building towers as tall as possible! This is a great time to talk with children about the size of their towers and help them use math words like shorter and taller.

Materials: Blocks

Directions:

1. Ask your child to build block towers with you.
2. As your child is building, talk to your child about your towers using the words shorter and taller. You can say, "Your tower is taller than mine!" or "Can you build a tower that is shorter than mine?"
3. Encourage your child to knock the tower down and play again.
